

## Differences between plans

St.Petersburg, Russia. Compiled by SMath LLC. Dated: 18/10/2024.

| Feature | Plan name |          |          |           |
|---------|-----------|----------|----------|-----------|
|         | Trial     | Personal | Advanced | Unlimited |

### Basic features of SMath Studio (main features of the program)

|  |                                 |                                  |     |                                   |
|--|---------------------------------|----------------------------------|-----|-----------------------------------|
| Free minor program updates   | Yes                             | Yes                              | Yes | Yes                               |
| Free major program updates   | Yes                             | Yes                              | Yes | Yes (for subscription only)       |
| For personal use   | Yes (has limitations)           | Yes                              | Yes | Yes                               |
| Obtaining offline licenses   | Not applicable                  | Yes                              | Yes | Yes (from local and root servers) |
| Automatic attribution in calculations  | No                              | Yes                              | Yes | Yes                               |
| Personalization through program activation   | No                              | Yes                              | Yes | Yes                               |
| Multiple activations by one user   | No                              | Yes (up to 5 devices)            | Yes | Yes (with multiple license)       |
| Automatic update of extensions   | No                              | Yes (when updating SMath Studio) | Yes | Yes                               |
| No watermarks when printing (about using the free version of the software)         | No                              | No                               | Yes | Yes                               |
| Full access to paid extensions   | No                              | No                               | Yes | Yes                               |
| For commercial use   | No                              | No                               | No  | Yes                               |
| Various integration and automation methods   | No                              | No                               | No  | Yes                               |
| Approved for use in organizations  | No                              | No                               | No  | Yes                               |
| Priority support with response within 24 hours                                     | No                              | No                               | No  | Yes                               |
| Multiple activations on different environment                                      | No                              | No                               | No  | Yes (with a floating license)     |
| Multiple activations by different users  | No                              | No                               | No  | Yes (with multiple license)       |
| Adding additional user devices to the license                                      | No                              | No                               | No  | Yes                               |
| Installation of a license server on the organization's network + software branding | No                              | No                               | No  | Yes (optional)                    |
| Registration on the Licensor's website is not required                             | No (reminders in the interface) | No                               | No  | Yes                               |
| Licenses without time limits   | No                              | Yes                              | No  | Yes (with a lifetime license)     |

### Built-in SMath Viewer extension (the ability to create executable files based on worksheets)

|   |    |     |     |     |
|---|----|-----|-----|-----|
| Ability to change program properties    | No | Yes | Yes | Yes |
| Use of programs for commercial purposes | No | No  | Yes | Yes |

### Cloud version of SMath Studio (the ability to work through a browser without installing of the program)

|  |                       |             |             |             |
|--|-----------------------|-------------|-------------|-------------|
| Creating private worksheets (not publicly available) | No                    | Yes         | Yes         | Yes         |
| Sharing worksheets                                   | No                    | Yes         | Yes         | Yes         |
| Embedding images into worksheets                     | No                    | Yes         | Yes         | Yes         |
| Number of simultaneously open documents              | 3 (per IP address) *  | No limits * | No limits * | No limits * |
| Number of simultaneously open sessions               | 10 (per IP address) * | No limits * | No limits * | No limits * |
| Maximum number of worksheets per account             | Not applicable        | 3 pcs.      | No limits * | No limits * |

| Feature  | Plan name      |          |          |           |
|--|----------------|----------|----------|-----------|
|  | Trial          | Personal | Advanced | Unlimited |
| Maximum total size of worksheet files in the account | Not applicable | 512 KiB  | 256 MiB  | 1 GiB     |
| Maximum CPU time to perform calculations             | 1 s            | 1 s      | 3 s      | 3 s       |
| Restoring the state of worksheets from revisions     | No             | No       | Yes      | Yes       |
