Matlab and Excel PolyFit example

This example can help identifying the same values in SMath, Excel and Matlab

```
f(x) := sin(x)
X := [0..9] / 9 . 4 . pi
Y := f(X)
Ten points over a sinusoid
```

```
n := 6
PolyFit degree
C := PolyFit (X, Y, n)
R2 (X, Y, n) = 0.9057
```

C =

Matlab screenshot

```
x = linspace(0,4*pi,10);
y = sin(x);
p = polyfit(x,y,6)
